## THE RED COLLECTION

---

### FERRARI F40

This superb example was delivered new to Switzerland in February 1990 and is the collector's preference specification being both 'non-cat' and 'non-adjust'. Used incredibly sparingly, the car had covered just 1,700km by the time of its second owner in 2004. At that time, it was imported into the UK and since then has enjoyed a very thorough history and annual maintenance schedule, which helps authenticate its low mileage. The file contains many invoices and statements regarding its originality and the paintwork presents extremely well. Today this extraordinary example has covered just 2,371km from new and this F40 presents on the button. 'Red Book' Classiche certification was also recently awarded by the factory.
